

Assumptions:

- Chrome Firefox (i.e. desktop browsers supporting mediaRecorder) dominate the desktop market (75%)
- In terms of robustness: liveness video > selfie from realtime camera UI > mobile file upload (directing to camera mode) > desktop file upload

Guidelines:

- If there are mediaRecorder support issues on desktop, we will fall back to “selfie from realtime camera UI”
- Furthermore, if there are any camera issues (exception, stream not shown, etc) on desktop, we will force x-device
- If there are any camera issues on mobile, we will fallback to file upload (directing to camera mode)
- We will force user to always grant camera permission, and won't provide a fallback if they deny permission

This is the proposed logic for liveness fallback

Mobile

- If there is no camera or no browser support for camera altogether (i.e. no cameraAPI support)
 - **file upload (directing to camera mode)**
- Else if browser does not support mediaRecorder (i.e. iOS devices)
 - Fallback to “**selfie from realtime camera UI**”
 - If there is error/user struggles
 - **file upload (directing to camera mode)**
- Else (e.g. most Android)
 - **Liveness video**
 - If there is error/user struggles
 - **file upload (directing to camera mode)**

Desktop

- If there is no camera or no browser support for camera altogether (i.e. no cameraAPI support)
 - **X-device to liveness on mobile**
- Else if browser does not support mediaRecorder (edge/safari)
 - Fallback to “**selfie from realtime camera UI**”
 - If there is error/user struggles

- **X-device to liveness on mobile**
- Else
 - **Liveness video**
 - If there is error/user struggles
 - **X-device to liveness on mobile**

Proposed story sequencing (based on likelihood)

1. Liveness to selfie UI fallback on both desktop and mobile
 - a. <https://jira.onfido.co.uk/browse/CX-2238> (fallback)
 - b. <https://jira.onfido.co.uk/browse/CX-2381> (info in callback)
2. Desktop no camera x-device
 - a. <https://jira.onfido.co.uk/browse/CX-2363> (x-device to support liveness)
 - b. <https://jira.onfido.co.uk/browse/CX-2364> (copy changes)
3. Mobile no camera file upload
 - a. <https://jira.onfido.co.uk/browse/CX-2393>
4. Desktop camera failure x-device
 - a. <https://jira.onfido.co.uk/browse/CX-2214>
5. Mobile camera failure file upload
 - a. <https://jira.onfido.co.uk/browse/CX-2382>
