

- Clarifying different "selfie capture" flows to cross-device Android mobile users
 - eg. "Fallback selfie" option explained on desktop > cross-device > Android users now can use liveness option
- Next user actions for different warning/error states on face capture
 - eg. Connection lost vs Token expired, Camera malfunction vs Timeout
- Clarifying camera fallback on mobile error
 - eg. User changing between web camera and native camera on mobile error

Note: As a business we don't want to allow this option to prevent fraud
